BACHELOR OF SCIENCE IN APPLIED SCIENCE IN EXERCISE SCIENCE 4+1 MPH TRACK

The Exercise Science 4 + 1 MPH track begins preparing students to work oneon-one with individuals performing health assessments, fitness testing, and writing exercise prescriptions for a variety of populations (BSA) and continues to prepare the student to improve the health of entire populations (MPH).

The undergraduate degree in Exercise Science prepares students for careers that include:

- · medically based wellness programs
- · corporate wellness programs
- · strength and conditioning
- · clinical rehabilitation programs such as cardiac/pulmonary rehabilitation
- · public and private fitness clubs

The master's degree in Public Health prepares students for careers that include:

- · health informatics specialist
- · healthcare administrator
- · epidemiologist

COURSE

· public health project manager

TITLE

· healthcare consultant

The following are KSS courses required in the major for this degree:

S.H.

COURSE	IIILE	ъ.п.		
FIRST YEAR REQUIREMENT -STUDENT SUCCESS				
YSU 1500	Success Seminar	1-2		
or SS 1500	Strong Start Success Seminar			
or HONR 1500	Intro to Honors			
General Education Requirements				
ENGL 1550	Writing 1	3-4		
or ENGL 1549	Writing 1 with Support			
ENGL 1551	Writing 2	3		
CMST 1545	Communication Foundations	3		
STAT 2625	Statistical Literacy and Critical Reasoning	3-6		
or STAT 2601	Introductory Statistics			
or STAT 2625C	Statistical Literacy and Critical Reasoning with Co- Requisite Support			
Natural Science Requirements				
BIOL 1551 & 1551L	Anatomy and Physiology 1 and Anatomy and Physiology 1 Laboratory	4		
BIOL 1552 & 1552L	Anatomy and Physiology 2 and Anatomy and Physiology 2 Laboratory	4		
Social Science Requirements				
PSYC 1560	General Psychology	3		
Social Science Elective (1 Course)				
Social & Personal Awareness Requirements				
FNUT 1551	Normal Nutrition	3		
PHLT 1568	Healthy Lifestyles	3		
Arts & Humanities Requirement				
Arts and Humanitie	es Elective (1 Courses)	3		

Arts and Humanition Major Requirement	es Elective (1 Courses)	3
KSS 1595	Introduction to Kinesiology and Sport Science	2
KSS 1559	Aerobic Conditioning Activities	1
KSS 1560	Resistance Training	2
KSS 15XX Activity	,	1
KSS 2605	Sports First Aid and Injury Prevention	3
KSS 2625	Pedagogical Aspects of Exercise Science	3
KSS 3700	Exercise Evaluation and Testing	4
KSS 3710	Physiology of Exercise	5
& 3710L	and Physiology of Exercise Laboratory	
KSS 3720	Kinesiology and Applied Anatomy	4
KSS 3730	Exercise Prescription	4
KSS 3760	Strength Training and Conditioning	3
KSS 4805	Administration of Exercise Programs	3
KSS 4810	Clinical Exercise Testing and Prescription	4
KSS 4875	Exercise Counseling and Behavioral Strategies	4
KSS 4880	Internship	8
Additional Courses	Needed	
PHYS 1506	Physics for Health Care	3
MATH 1513	Algebra and Transcendental Function	4-5
or MATH 1510	College Algebra	
CHEM 1515	General Chemistry 1	4
& 1515L	and General Chemistry 1 Laboratory	
PHLT 5804	Multicultural Health (Offered Spring only) Counts toward graduate credit	3
MPH 6901	Public Health Concepts (Offered Fall/Summer only) Counts toward graduate credit	3
MPH 6904	Biostatistics in Public Health (Offered Fall/Summer	3
	only) Counts toward graduate credit	
Elective courses	only) Counts toward graduate credit	10
Elective courses Total Semester Ho	Unity)	10 0-126
	Unity)	
Total Semester Ho	Unity)	0-126
Total Semester Ho Year 1	Unity)	
Total Semester Ho Year 1 Fall	urs 120	0-126 S.H.
Total Semester Ho Year 1 Fall YSU 1500	urs 120 Success Seminar	0-126 S.H.

Learning Outcomes

The student learning outcomes for the BSA in exercise science are as follows:

- Students will demonstrate knowledge and skills in health, fitness and performance assessment
- Students will demonstrate skills in risk factor and health risk identification and the ability to prescribe and implement exercise safely in healthy individuals, special populations (i.e. older adults) and individuals with controlled cardiovascular, pulmonary, and metabolic diseases and other clinical populations.
- Students will demonstrate competency in effectively educating, exercise counseling and using behavioral strategies in individuals regarding lifestyle modification.

- Students will demonstrate competency in the legal and professional tasks related to the field.
- Students will demonstrate knowledge of implementing management policies related to the field.

The student learning outcomes for the MPH are as follows:

Core Competencies

- Use basic techniques and statistical software to access, evaluate, and interpret health data.
- · Apply analytic reasoning and methods.
- Interpret scientific and statistical results, including the strengths and limitations of scientific articles.
- Explain characteristics, strengths and limitations of epidemiological study design types.
- Apply behavioral health theories/models in developing community health promotion and intervention programs, and applications for research funding.
- Apply principles of strategic planning to public health, including continuous quality improvement, leadership, teamwork, systems thinking, and social marketing.
- Assess associations found between environmental hazards and health outcomes to influence environmental policies designed to protect populations.
- Apply principles of program planning, development, implementation, management, and evaluation in organizational and community initiatives.
- Use collaborative strategies in the design of policies, interventions, and programs.
- Communicate public health information to lay and professional audiences, using appropriate channels and technologies and with linguistic and cultural proficiency.
- Demonstrate ability to use credible evidence and rationale to guide wellreasoned decisions, proposals, and attitudes.
- Use individual, team and organizational learning opportunities for personal and professional development.

Generalist Competencies

- · Prepare proposals for funding from external sources.
- Demonstrate the ability to design, implement and execute a research protocol
- Consider the role of cultural and social factors in the planning and delivery of public health services and interventions.
- Demonstrate critical evaluation of ethical values, theories, and principles that guide public health inquiry and decision-making.
- Analyze the public health information infrastructure used to collect, process, maintain, and disseminate data in order to allow for decisionmaking at an administrative level.
- Apply theory and strategy-based communication principles adapted to different contexts.
- Explain how biological, chemical, and physical agents affect human health
