BACHELOR OF SCIENCE IN ENVIRONMENTAL SCIENCE

The environmental science program leading to a Bachelor of Science (BS) prepares students for graduate school or careers in health and safety, natural resource management, public health, environmental consulting, environmental regulations, environmental education, and other related fields:

- · 42-44 s.h. of environmental science courses
- · 30-31 s.h. of support courses in science and mathematics
- · a prescribed minor of 12-19 s.h

The minor must include 9 s.h. of upper division courses (3000 level and above) and may be in:

- · biology or biomathematics
- · biological or forensic anthropology
- · biological or forensic anthropology
- · chemistry
- · economics
- · environmental engineering
- · environmental geography or geography
- · environmental health and safety
- · forensic science
- · geographic information science
- · geoscience or environmental geology
- · law enforcement
- · mathematics or statistics
- · mechanical engineering
- · public health

Credits may include those required for support science and mathematics, as applicable. The student is welcome to take additional courses in other departments as electives. Students are encouraged to develop teamwork, communication, computer and problem-solving skills. This degree may be earned in eight semesters if students average 15 hours per semester.

Majors transferring in from other programs at YSU or from other universities may use up free electives and/or require additional semesters or summers of study. College and university requirements apply (total hours, upper division hours, general education goals, etc.).

COURSE	TITLE	S.H.
FIRST YEAR REQUIREMENT -STUDENT SUCCESS		
YSU 1500	Success Seminar	1-2
or YSU 1500S	Youngstown State University Success Seminar	
or HONR 1500	Intro to Honors	
General Education Requirements		
ENGL 1550	Writing 1	3-4
or ENGL 1549	Writing 1 with Support	
ENGL 1551	Writing 2	3
Mathematics Requirement (met with MATH 1570 or 1571 in major)		
Arts and Humanities (6 s.h.)		
Natural Sciences (2 courses, 1 with lab) (6-7 s.h.)(Requirement met		
through science courses in major)		
Social Science (6 s.h.)		6
General Education Electives		
General Education Electives (6 s.h. Met with science courses in the major)		
CMST 1545	Communication Foundations (Required)	3
Major Core Requirements		

ENST 2600	Foundations of Environmental Science	4	
& 2600L	and Foundations of Environmental Science Laboratory	4	
ENST 2620	Freshman/Sophomore Seminar	1	
ENST 3700 & 3700L	Environmental Chemistry and Environmental Chemistry Lab	4	
ENST 3730	Air Quality	3	
ENST 3750	Seminar	1	
ENST 3751	Water Quality Analysis	3	
or ENST 3752	Soil Quality and Analysis

Fundamentals of Physics 1, GEOG 2630 Weather, or STAT 2601 Introductory Statistics or STAT 3717 Statistical Methods.

Request a Graduation Evaluation after completing 80-85 s.h. from the STEM Advising Center, 2325 Moser Hall, (330) 941-2512.

Learning Outcomes

Spring

The Environmental Science Program educates students in the fundamental knowledge about the environment, its resources, processes, and the changes and problems that have occurred and potential solutions to those problems. The student learning outcomes for the BS in environmental science are:

Interdisciplinary: Demonstrate an understanding of basic environmental processes and the contributions of different scientific and social disciplines to environmental issues.

Research: Properly apply the scientific method to research an environmental question including design of experiments, acquisition of data (qualitative and quantitative), and articulate results in discussions and conclusions.

Communicate: Effectively converse using the language, concepts, and models of environmental science in written, visual, and numerical formats for specific and general audiences.

Problem Solving: Demonstrate the ability to identify and apply appropriate field, laboratory, or modeling methods to address environmental problems and propose sustainable solutions.

Critical Thinking: Students will utilize their understanding of pollution and environmental systems and published information to systematically, creatively, and analytically examine current issues.
