

ASSOCIATE OF APPLIED SCIENCE IN CIVIL AND CONSTRUCTION ENGINEERING TECHNOLOGY

The associate degree program prepares technicians to support civil engineers in structural design, public works, construction, transportation, and environmental engineering. Most graduates are hired by government agencies, consulting engineers, architects, and contractors.

Students in the civil and construction engineering technology (CCET) program may choose to complete two years of study and earn an Associate of Applied Science (AAS) degree. The AAS degree provides early access to employment in engineering support positions. Upon completion of the AAS degree, the student may continue on for the Bachelor of Science in Applied Science (BSAS) degree. This program provides additional coursework, continuing the student's growth to that of an engineering technologist or designer. Exceptional students may be eligible for enrollment in a Master of Engineering or Master of Business Administration program. Students interested in construction may choose a certificate program in construction management.

Program Educational Objectives

Educational objectives for the civil and construction engineering technology programs have been developed by faculty and the program industrial advisory committee to support the university, college, and School of Engineering Technology missions. Graduates of the CCET associate degree program are prepared to support civil engineers in:

- structural design
- public works
- construction
- inspection
- transportation
- environmental engineering

Program Outcomes

Graduates in civil and construction engineering technology will achieve the following learning outcomes by the time they graduate:

Associate in Applied Science Degree Program

Graduates of the associate degree in civil and construction engineering technology will possess the following competencies upon graduation:

- **Learning Outcome 1:** use graphic techniques to produce engineering documents and use modern instruments, methods, and techniques to implement construction contracts, documents, and codes
- **Learning Outcome 2:** conduct standardized field/laboratory testing on civil engineering materials and evaluate materials/methods for construction projects
- **Learning Outcome 3:** utilize modern surveying methods for land measurement and/or construction layout
- **Learning Outcome 4:** determine forces and stresses in elementary structural systems
- **Learning Outcome 5:** estimate material quantities and costs for technical projects
- **Learning Outcome 6:** employ productivity software to solve technical problems

Accreditation and Registration

The civil and construction engineering technology associate program is accredited by the Engineering Technology Accreditation Commission of ABET, <http://www.abet.org>.

Date of last campus visit: October, 2011

Accredited through: 2018

Next campus visit: October 2017

Link to accreditation body: ABET (<http://www.abet.org>)

Course	Title	S.H.
Year 1		
Fall		
ENTC 1501	Introduction to Engineering Technology	2
ENTC 1505	Engineering Technology Concepts	4
MATH 1513	Algebra and Transcendental Function	5
DDT 1503	AutoCAD 1	2
DDT 1504	Drafting and Plan Reading	2
ENGL 1550	Writing 1	3
Semester Hours		18
Spring		
MET 1515	Mechanics 1	3
CCET 2604	Properties and Strength of Materials	3
CCET 2614L	Materials Laboratory 1	2
ENGL 1551	Writing 2	3
PHYS 1501	Fundamentals of Physics 1	4
Social Science GER ¹		3
Semester Hours		18
Year 2		
Fall		
CEEN 2610 & 2610L	Surveying and Surveying Laboratory	4
MET 2616	Mechanics 2	3
CCET 3709	Structural Analysis 1	3
CCET 2617	Construction Methods and Materials	3
PHIL 2626	Engineering Ethics (Arts & Humanities GER)	3
DDT 2607	CAD Microstation	2
Semester Hours		18
Spring		
MATH 1570	Applied Calculus 1	4
CCET 3724	Hydraulics and Land Development	3
CCET 3706	Structural Design	4
CCET 3711	Specifications and Estimating	3
CMST 1545	Communication Foundations	3
Semester Hours		17
Total Semester Hours		71

¹ General Education Requirement: see "Schedule of Classes" for details. SS = Social Sciences - ECON 2610 - Principles of Microeconomics, is recommended but not required.
