DOCTOR OF PHILOSOPHY IN HEALTH SCIENCES

Program Director
Ken Learman, PhD, PT
Director, PhD in Health Sciences
Professor, Physical Therapy
klearman@ysu.edu

Mission:
To prepare the next generation of academics who are excellent researchers, instructors, and are prepared to serve Northeast Ohio and beyond.

Vision:
We aspire to become the premier choice for doctoral preparation of healthcare professionals seeking to transition from the clinic to the classroom or research lab.

Admissions requirements:
Adequacy of students
The Ph.D. in Health Sciences is designed to accept students who possess a bachelor’s, master’s or a clinical doctorate degree. The bachelor’s and master’s degrees considered should be health related, but will consider students with a basic science degree (e.g. biology) if there is an established interest in healthcare. Additionally, there has been a track established for the current entry-level DPT students at YSU to enter a dual DPT/Ph.D. track at the end of their first year in the DPT program. All applicants to the program will be evaluated against the following admission criteria:

• Student with an interest in the Health Sciences and an interest in pursuing employment in academia, research, or clinical practice.
• Minimum overall 3.0 GPA from a bachelor’s or master’s degree.
• Exceptions will be considered on an individual basis for a GPA of 2.7-2.99. This will mandate a provisional admission.
• Graduate Record Examination (GRE) will be required for applicants who currently have a bachelor’s degree. Scores of 290 on parts 1 and 2, and 3.5 writing score are recommended.

Admissions will be completed by considering the student’s individual research agenda as well as compatibility and availability of faculty to serve on dissertation committees.

Graduate Faculty
James A. Benedict, PT, Ph.D., Associate Professor
Healthcare policy; pro bono care; vulnerable populations
Matthew Campbell, Ph.D., ATC, Assistant Professor

Cara A. Carramusa, Ed.D., PT, M.S., GCS, Assistant Professor
PT education research: employability skills and professional dispositions/identity, teaching and learning, clinical education; older adults: fall risk management/prevention, active aging, population health/socialization of the physical therapy profession

Chad Cook
Clinical examination and conservative or surgical treatment of orthopedics

Richard Albert Deschenes, Jr., Ph.D., Assistant Professor
Materials science; concrete durability and materials; applied mechanics

Debbie Espy
Human movement science; neurological rehab; biomedical engineering

David William Griswold, D.P.T., Ph.D., Associate Professor
Concussion management; vestibular rehabilitation; effects of manual therapy on pain and disability for orthopedic conditions; physiological and clinical effects from dry needling

John M. Hazy, Ph.D., Professor, Chair
Community/behavioral health (drugs and crime); methodology and assessment; life course and cultural issues; teaching effectiveness

Nancy Crum Landgraff, PT, Ph.D., Professor, Chair
Stroke rehabilitation and outcomes

Kenneth Learman, PT, Ph.D., Professor
Physical therapy interventions for the spine; concussion management; chronic pain phenotyping; headache differentiation

Linda Pax Lowes
Pediatric Physical Therapy; neurological rehab

Richard Lee Rogers, Ph.D., Associate Professor
Social problems and criminology; organizational and economic sociology; statistics and research methods; social history; Anglo-American religious movements; ecological analysis

Annie Q. Tapp, D.P.T., Assistant Professor

Degree Requirements
Candidates that enroll with a bachelor’s degree will complete all core courses (60 s.h.) and an additional 30 s.h. as approved by the Program Director. These courses can be an individualized plan using existing master’s courses in the College of Health and Human Services, the Gerontology program, other master’s courses, or Concentration Course Electives in the Ph.D. program.

Total Semester Hours 60

**Learning Outcomes**

By graduation from the Doctor of Philosophy in Health Sciences program, students will:

1. Propose a research study utilizing appropriate statistical or assessment techniques to answer a question based on an identified gap in the literature.
2. Apply scientific evidence to specific patient/client cases in their fields.
3. Explain how psychosocial and mental & behavioral factors impact healthcare outcomes of various disease processes relate to their area of research.
4. Design a study to answer an original research question regarding the teaching andragogy in Health Sciences education.
5. Communicate their original research both verbally and through manuscripts submitted for publication in academic journals.
6. Apply interdisciplinary research skills to solve current and future problems as professionals in Health Sciences.
