The Master of Health and Human Services program prepares students from health and human services backgrounds with the skills and abilities for supervisory/managerial or health promotion positions in the community. The program is structured as a completely online or evening college program. After completion of an academic core of coursework, students may concentrate in health promotion, health care administration or health informatics for health and human service professions. The Master of Business Administration healthcare administration track is a collaborative degree between The Bitonte College of Health and Human Services and the Warren P. Williamson, Jr. College of Business Administration.

Admission Requirements
In addition to the minimum College of Graduate Studies admission requirements, applicants must complete the following undergraduate courses or their equivalent:

**COURSE** | **TITLE** | **S.H.**
---|---|---
Research Methodology | 3
Statistics | 3

Students should complete any undergraduate deficiency coursework before completion of the third semester of graduate work and must complete it prior to enrolling in related graduate-level courses. Also, students must submit three letters of reference:

- one from a faculty member,
- one from an employer, and
- one from another source, or
- two from faculty members and one from another source.

Regular admission requires a cumulative undergraduate grade point average of at least 2.7 (on a 4.0 scale).

Graduate Faculty
**John M. Hazy**, Ph.D., Professor, Chair
Community/behavioral health (drugs and crime); methodology and assessment; life course and cultural issues; teaching effectiveness

**Tiffany F. Hughes**, Ph.D., Associate Professor
Cognitive impairment and dementia; fall prevention; health promotion

**Daniel J. Van Dussen**, Ph.D., Professor
Social and psychological determinants of health among older adults; the family; social support; statistics and methods

There are two areas of coursework in the MHHS: an academic core and a specialty track. A thesis or non-thesis option is available with each track.

The academic core consists of 15 semester hours distributed among the following course areas:

- Research and Statistics (6 semester hours),
- Health service and health performance courses (9 semester hours)

A total of 15 semester hours of coursework is devoted to a specialty track in health promotion, administration for health and human service professions, or health informatics. Each track offers a thesis or non-thesis option. The non-thesis option in the health promotion, administration for health and human service professions, and health informatics track requires the student to complete an internship. The thesis must be submitted according to the general requirements established by the College of Graduate Studies. The student is required to defend the thesis in an oral presentation before a committee of graduate faculty from a minimum of two academic disciplines. Students selecting the non-thesis option must successfully complete a comprehensive examination and additional courses for graduation.

Learning Outcomes
1. The student will demonstrate skills to access and integrate important facts, concepts, principles, and theories in the field of management when developing solutions to problems.
2. The student will utilize current technologies such as, computer and online systems/services, to access and communicate information.
3. The student will demonstrate effective research skills.
4. The student will produce a manuscript in a style suitable for publication.
5. The student will demonstrate skills to critically analyze health and human services issues.

Graduate Courses
HHS 6900 Special Topics 1-3 s.h.
Topics may vary from semester to semester and will be announced along with prerequisites and hours. May be repeated once for a total of six hours.

HHS 6918 Program Planning and Evaluation 3 s.h.
Principles of planning, developing, implementing, and evaluating programs for nonprofits to improve outcomes.
Prereq.: College of Health and Human Services student or permission of instructor.

HHS 6922 Planning and Fiscal Management 4 s.h.
Principles and skills to conduct strategic plans, analyze and administer programs, develop budgets, and familiarize students with fiscal matters related to funding sources.
Prereq.: ACCT 2602 and HHS 6918 or permission of instructor.

HHS 6930 Health Informatics 3 s.h.
This course presents a detailed review of the structure of provider, payer, and other health care organizations along with the workflow in these types of organizations and their information system needs; how informatics assists these organizations; how information is used in business and clinical operations; and how information technologies interact with business and clinical stakeholders.
Prereq.: MHHS student or permission of instructor.

HHS 6932 Health Care Administration 3 s.h.
This course focuses on the fundamental philosophy and techniques common to healthcare Administration. Students will develop skills related to the following broad healthcare management competencies: (1) communication and relationship management, (2) professionalism, (3) leadership, (4) knowledge of the healthcare system, and (5) business skills and knowledge.
A key feature of this course is the use of a well-known simulation model called FlexSim. Students utilize a copy of the simulation model and detailed case studies of the simulation from major hospital systems across the US.
Prereq.: acceptance to the MHHS Program.

HHS 6935 Clinical Informatics 3 s.h.
This course will provide Health and Human Services student with a comprehensive framework of Clinical Informatics knowledge. It addresses how clinical informatics assists health care organizations, how information is used in clinical operations, and how information technologists interact with clinical stakeholders in provider, payer, and other healthcare organizations.
Health care delivery applications include electronic health records, clinical information systems, Tele-health, patient safety, patient and community education, and care management. Students will analyze the informatics function and organizational relationships in their organizations.
Prereq.: Current enrollment in the MHHS or MSN program, or with permission of the instructor; Senior nursing students may take with permission from the Nursing department and the Graduate College.

HHS 6945 Health Care System Analysis 3 s.h.
This course presents a practical approach to introduce students to information technology and systems development. The course emphasizes the importance of system analysis and design in health care/business and clinical environments. The focus is on producing an add application that is integrated with your vendor applications.
Prereq.: Current enrollment in the MHHS or MSN program and successful completion of HHS 6930.

HHS 6949 Community Health Practice 3 s.h.
An examination of various physiological, psychological, and sociological factors which influence the health and provision of healthcare in a community.
Prereq.: AHLT 4810 and PHLT 3791 or equivalent or permission of instructor.

HHS 6953 Health Behavior 3 s.h.
A review of research studies, theories, and models which identify elements that influence behavior and determine factors which deter positive behaviors.
Prereq.: HHS 6949 or permission of instructor.

HHS 6955 Health Care Quality in the Electronic Health Record 3 s.h.
This course presents a review of the Electronic Health Record and the US National Health Information Network. Structure of provider, payer, and other health care organizations along with the workflow in these types of organizations and their information system’s needs. It addresses how informatics assists these organizations, how information is used in business and clinical operations, and how information technologists interact with business and clinical stakeholders in provider, payer, and other healthcare organizations. Students will analyze the informatics function and organizational relationships in their organizations.

HHS 6958 Health Services Issues 3 s.h.
An examination of current philosophical, legal, and ethical issues in healthcare with the inclusion of the role of health professionals in national health policy, and healthcare reform.
Prereq.: HHS 6949 or permission of instructor.

HHS 6959 Foundation and Planning 3 s.h.
Developing effective health promotion programs through a study of the history, philosophy, ethics, and values of health promotion, as well as the principles of effective planning incorporating needs assessment and formulation of objectives.
Prereq.: CHHS student or permission of instructor.

HHS 6960 Health Education and Promotion 4 s.h.
Developing effective health promotion programs through a study of the history, philosophy, ethics, and values of health promotion.
Prereq.: Admission to the MHHS program or permission of the instructor.

HHS 6962 Health Care Reform 3 s.h.
The purpose of the course is to give students the skills necessary to understand all aspects of health and health care especially those related to Health Care Reform and recent and previous legislation. It will examine the supply of and demand for health services, and the analysis of health care systems and current, previous and potential future legislation relevant to health care reforms.
Prereq.: MHHS or OMBA major.

HHS 6971 Optimizing Performance and Commitment 3 s.h.
An examination of the motivational culture and performance in health and human services organizations. Includes the impact of resource management, personnel selection, recruitment, retention, and the motivational system in relation to employee performance and commitment.
Prereq.: AHLT 4810 or MGT 6900.

HHS 6980 Seminar 3 s.h.
A synthesis of the role of education and management in health or human services. Emphasis on specific problems, concerns, or relative issues related to various work settings. Research, developed, and presented using manuscript form and PowerPoint.
Prereq.: HHS 6958 and any research class or permission of instructor.
HHS 6990 Internship  2 s.h.
Supervised internship in selected health and human services facilities offering health and human services administration experience.
Prereq.: Approval of advisor.

HHS 6999 Thesis  1-4 s.h.

HHS 8949 Community Health Practice  3 s.h.
An examination of various physiological, psychological, and sociological factors, which influence the health and provision of healthcare in a community. D. program in Educational Leadership and HSC 3791 Community Health or equivalent or permission of instructor. Ed.D. students who have not taken HHS 6949 are required to complete HHS 8949 and complete a supplemental, substantive course assignment involving the determinants of health and their relationship to socioeconomic factors, socioeconomic inequalities, and race vs. class.
Prereq.: Admission to Ed.

HHS 8953 Health Behavior  3 s.h.
A review of research studies, theories, and models, which identify elements that influence behavior and determine factors that deter positive behaviors. D. program in Educational Leadership and HHS 8949. Ed.D. students who have not taken HHS 8953 are required to complete HHS 8953 and complete a supplemental, substantive course assignment involving research on health and human services issues.
Prereq.: Admission to Ed.

HHS 8958 Health Services Issues  3 s.h.
An examination of current philosophical, legal, and ethical issues in healthcare with the inclusion of the role of health professionals in national health policy and healthcare reform. D. program in Educational Leadership and HHS 8949. Ed.D. students who have not taken EDAD 6958 are required to complete EDAD 8958 and complete a supplemental, substantive course assignment involving research on health and human services issues.
Prereq.: Admission to Ed.

Health Informatics Certificate
Program Director
Dr. Ron Chordas (Interim)
(330) 941-3113
rkchordas@ysu.edu (jplyons@ysu.edu)

The Health Informatics was designed for students in the Computer Science Information Systems (CSIS) interested in working in Health Care to earn a certificate which will help them gain employment in the Health Care field which has undergone a significant advancement in recent years in the area of Health Information Systems. MHHS students will also have an opportunity to receive additional training in Computer Science Information Systems leading to a Health Informatics Certificate in addition to their MHHS Degree.

Admission Requirements
Admission to the HHS or CSIS program.

Learning Outcomes
1. To prepare future health informatics leaders who understand the complex interplay among the health informatics stakeholder communities,
2. To enhance the ability to use the inter-relationships among health information technology, the healthcare delivery and regulatory processes, and information management,\
3. To grow a set of leadership behaviors that emphasizes professional competence, moral and ethical performance,
4. To demonstrate professional and technical competence in health informatics,
5. To instill a dedication to the use of technology for the benefit of humanity,
6. To create a sensitivity to the impact that the use of technology has on the person, and
7. To build a desire for life-long professional learning and development in health informatics.
