Course Description

6948. Data Driven School Improvement and Program Evaluation.This course examines the integral impact data-informed decision management has on educational accountability and the efficacy of program initiatives that facilitate standards for improvement in the classroom, building, and district level. Comprehensive data retrieval, analysis, and interpretation are invaluable to promote equitable and culturally responsive leaders who foster not only school improvement, but also a climate where accountability for students reaches further than academic performance.

Course Readings

Group	Title	Author	ISBN
Required			

Required Text/Resources

Goldring, E., & Berends, M. (2009). Leading with Data: Pathways to Improve Your School. Thousand Oaks, California: Corwin Press

Recommended Text/Resources

Publication Manual of the American Psychological Association. 6th Edition.
