### Course Description

6906. Policy and Environmental Health Sciences in Public Health. This course provides an overview of public health policy, policy development, and advocacy. Environmental health issues serve as an example of the intersection between policy and science. Environmental health topics include air/water quality, food hygiene, sanitation, municipal/infectious/hazardous waste, vector-borne disease, occupational health, legal/risk issues, One Health, and global issues. Prereq.: Graduate standing, permission of course director required for non-MPH students. 3 s.h.
