Course Description

8105. Research Methods for the Practitioner. Research Methods for the Practitioner is an essential course designed for educators, administrators, and research practitioners seeking to enhance their research competency. The course is focused on providing practitioners with knowledge, skills, and resources to apply research-based practices in educational contexts. This course will enable students to think critically about research processes, develop a better understanding of scholarly research literature, and enhance their research literacy. By taking this course, students will gain insights into how research is conducted, evaluated, and used to inform decision making within their field. The course emphasizes practical application and hands-on experience, enabling students to develop a research plan, conduct data collection, and analyze and interpret research findings. As such, this course is an essential resource for practitioners seeking to improve their research skills and contribute to evidence-based practices within their educational contexts. 3 s.h.
