Course Description

6944. Operations & Supply Chain Management. Operations and Supply Chain Management (OSCM) examines the functions of sourcing, materials management, operations planning, distribution, logistics, retail, demand forecasting, order fulfillment, and more in a broad area that covers both manufacturing and service industries. In this course, students will learn what functions OSCM performs, why it is important, and how to make business decisions in the field of OSCM. The objective is to help students develop a systematic working knowledge of the concepts and methods related to designing and managing operations in a supply chain. Prereq.: graduate standing, admission to the OMBA Program or permission from the MBA Program. 3 s.h.
