BACHELOR OF SCIENCE IN BUSINESS ADMINISTRATION IN FINANCE, FINANCIAL MANAGEMENT TRACK

The Financial Management track of the Finance major focuses on managing the finances of an organization as opposed to individuals. Examples of duties include analyzing financial information and competitor data, making recommendations based on the financial information, and monitoring outcomes. Employers hiring Financial Management track students include banks, investment companies, insurance companies, financial institutions, and publicly traded and privately held companies.

CAREER OPPORTUNITIES

Financial Managers can be found in nearly all firms, government agencies, and organizations spending a great deal of time developing strategies to help the organization realize its long-term goals. Financial Managers supervise the preparation of financial reports, guide investment activities, and execute cashmanagement strategies.

All business majors are strongly encouraged to complete internships. Internships are career-related work experiences that enable students to apply their knowledge and skills in an organizational setting. In the WCBA, internships that are approved for academic credit must be paid. Completing a career-related internship increases a student's job opportunities upon graduation.

STUDENT EXPERIENCES

Finance students at Youngstown State University have the opportunity to build their leadership skills through various WCBA student organizations (https://ysu.edu/academics/williamson-college-business-administration/student-organizations/). Housed in the Lariccia School of Accounting and Finance are the Student Investment Fund, the Institute of Management Accountants, and Beta Alpha Psi, the professional business organization for accounting, finance and information system majors.
