The Pre MPH-DFM (BSAS Food and Nutrition-Graduate track) is an upper-division generalist dietetics program with an emphasis in community wellness. The program prepares students for professional practice and leads to eligibility for graduates to sit for the examination to become Registered Dietitian Nutritionists (RDN) and Licensed Dietitians in the state of Ohio. During the four-semester program, each student accrues supervised practice hours covering medical nutrition therapy, community nutrition and wellness, maternal and child, foodservice, and aging in addition to public health preparation.

A community wellness emphasis has been identified as a need in the regional area that Youngstown State University serves. Graduates of the Master's in Public Health/Dietetics Future Model Track will be positioned to assume major roles in community health programs. The program is currently accredited through the Accreditation Council for Education in Nutrition and Dietetics (ACEND) within the Academy of Nutrition and Dietetics (AND).

Admission to the MPH-DFM is restricted since only 12 students can be accommodated. Satisfactory completion of a minimum of 65 semester hours (to qualify for junior status) is required before the student can apply to the program. Detailed information regarding criteria and procedures is available from the Department of Health Professions. Students are accepted to the MPH-DFM on an ongoing basis and start the program during summer or fall semester.

Upon satisfactory completion of the MPH-RDN, graduates are issued a verification statement that confirms eligibility to take the Commission on Dietetic Registration (CDR) registration examination for dietitians. Graduates who pass the registration examination are entitled to use the RDN credential to signify professional competence in the field of Dietetics.
